Best Games The biggest games yet to launch on the global market Updated on August 31st, 2022 If you've been looking for something new and exciting, maybe something that isn't even available worldwide, and could well be the next big thing, then look no further, you've found the list of the best games currently in soft launch, and we've brought all of the best into one place. Sometimes developers like to make sure the paying public is willing to play their game before they push it to every device in the world. And thus, we find ourselves with soft launch games. Available in just a handful of countries and regions, a soft-launched game is subject to drastic change as developers take on board customer feedback (and other metrics) to alter the game and ensure the best possible product is ready for when it goes to worldwide launch. But here's the kicker - we can see when developers do that. And when you're looking at some of the big games, like the ones we have on this list, then you can find yourself getting very excited, and even a little jealous that you can't play it yet. How to play soft-launched games right now, in any country So to help you out a little, we've collected up a huge list of some of the biggest and best games currently available in soft launch, which you might well be able to get if you have the right Apple ID or Google Play account to download it with. List of Android and iOS games in soft launch As mentioned above, these twilight games are likely to change massively throughout their soft launch periods, and it's nigh-on impossible to keep up with their development for months at a time. Some of our info might therefore only be accurate at the time of writing - sorry about that! Do let us know in the comments and we'll work to get it fixed! And if a game suddenly disappears, it might be because the developer has decided to stop development on it early and save themselves the cost of a big launch, or because the developer is gearing up for a big launch and wants to surprise the world. Whatever the case, we'll try and keep you updated when these things happen. What your appetite enough yet? Dig into the list of games below and find out what you could be playing later this year, or right now if you've got the right account in the right region. Original Post by Emily Sowden, historically updated by Ric Cowley and Harry Slater, now maintained by Dann Sullivan. Click Here To View The List » Publisher: Level Infinite Platform: Android/iOS Country: Closed Beta (Region restricted) NIKKE is a visually-stunning new third person mobile shooter that brings together thrilling strategic combat with exciting gacha collecting mechanics, as players assemble and lead an army of advanced combat android (NIKKE) to repel an invading force. If bad-ass female robots with stunning anime-style designs are your thing then this will definitely be for you! This entry is sponsored as part of Steel Media Preferred Partners. Publisher: Nelvis Games Inc. Platform: iOS Country: Philippines A real-time squad combat game which allows you to control a combination of 9 heroes in massive, open-world battles, all at once. Publisher: Futureplay Platform: iOS/Android Country: Ukraine, Finland, Poland If you're after a game that's kind-of like Bomberman but with cute animals instead, you'll want to check out Battle Bombers Arena. Publisher: HAEGIN Platform: iOS Country: Select Regions HAEGIN has announced the upcoming launch of Super Baseball League, its colourful sports title that's now open for pre-registration on Google Play following a successful soft launch in select regions. The real-time multiplayer baseball game lets players participate in casual sports with single inning rules and easy controls. Publisher: Supercell Platform: Android/iOS Country: Finland, Sweden, Norway, Denmark and Iceland The first of Supercell's next three Clash games, Clash Quest adds a match-three game twist to the Clash universe. You take a small army of troops to attack multi-stage islands, using your troops by selecting them from a grid on the bottom of the screen. You can select them as individuals, or you can send groups of the same type of troop to attack at the same time. If you do the latter then there are combo bonuses and special effects. Each unit type is inspired by their role in Clash of Clans, and you'll unlock more of them as you push your way through each stage and each section of the archipelago. We're keen to see how Clash Quest handles difficulty and unlocks as the game continues, as well as how it encourages you to mix unit types in the later levels. Create your character, craft your weapons, and head out into the world to meet new friends and defeat ugly creatures with one-thumb gameplay. You can join up with your mates to help bring peace to the world, and level up your skills to make sure no monster strikes you down on your quest. Publisher: Garena Games Online Platform: iOS/Android Country: Malaysia, Macau, Philippines, Indonesia, Taiwan, Thailand, Hong Kong It's been a while, but some of you might remember Contra. Together with Konami and Tencent (Timi), the classic sequel is slowly rolling out on mobile. Challenge yourself in intense PvP battles, pick your fighters, and stand side-by-side with the legends themselves, Bill and Lance. Developer: Bandai Namco Platform: Android and iOS Country: Hong Kong, South Korea, Taiwan and Macau Gundam Supreme Battle is a real-time action game that sees players pilot an array of Gundams. Whether you prefer a beam saber, a beam rifle, or a mega particle cannon, you'll be well catered for. You can explore a host of recognisable locations such as Jabro, Aboaku, Yakindue and battle powerful bosses such as Big Jam and Psycho Gundam. Publisher: Furinkazan Platform: iOS/Android Country: France, Switzerland, Belgium, Luxembourg If you've got a device that can take it, Optical is a mobile game based on AR and geolocation. Explore the astral world and discover what mysterious creatures are waiting to be found. Publisher: Outfit7 Platform: iOS/Android Country: Ukraine, Australia, Canada, Thailand, Slovenia, Netherlands, Israel, Sweden, Colombia Not long passes between removing an Outfit7 game from this list and adding another, it seems. Talking Tom: Blast Park takes Talking Tom and his friends to their own theme parks & rides. You'll need to fight off The Rakoonz, who have invaded the park, in order to keep the animal friends safe. Publisher: Electronic Arts Platform: iOS/Android Country: Mexico, Colombia, Egypt, Iraq The popular title has finally been announced for mobile, and it is as amazing as you might imagine. From the visuals to the gameplay, everything is as immersive as we've been accustomed to on the consoles, except a lot more tactile and at arms' reach. The game is currently available for alpha testing in selected countries, and will soon be (hopefully!) available worldwide, for everyone to enjoy. Publisher: Supercell Platform: Android/iOS Country: Finland, Sweden, Norway, Denmark, Iceland, Sri Lanka, Hong Kong, Philippines, Chile, Singapore, Canada It's a board strategy game that's using characters we already know very well from other Clash games. If you are eager to test it out, we have made a guide on how to download Clash Mini beta, so you can run through it quickly and try the game in case it's your cup of tea. Publisher: Activision Platform: Android/iOS Country: N/A (limited number of players via invitation only) Another massive CoD title will bless our mobile gadgets in the (near) future under the name of Call of Duty: Warzone, better known as Call of Duty: Project Aurora. We don't have a lot of details right now, as the game is still undergoing a lot of updates and testing, but if you're eager to learn more about it, you can check out its TapTap page and pre-register. Publisher: Gameloft Platform: iOS Country: The Netherlands and the Philippines We don't know much about Gameloft's Endless Survival, besides the fact it was recently renamed from Survive Together beyond it being a multiplayer game set in a world overrun with recently raised from the dead monsters. We'll be sure to keep an eye out on it for you, but if you're lucky enough to live in The Netherlands or The Philippines then feel free to dive in and give us the lowdown. Publisher: Niantic Platform: Android/iOS Country: Singapore For the NBA enthusiasts worldwide looking to show off their hoop-throwing skills, NBA All-World comes with exciting one-on-one tournaments where players can compete against each other in real-time tournaments and earn unique drops and in-game apparel by completing various mini-games. In a way, it's sort of like the famous Pokemon GO (since it's the same developer), but basketball themed. Publisher: Capital Games Platform: Android/iOS Country: The Philippines This strategy RPG featuring beloved characters from the worlds within Tolkien's books is a new and exciting title to look forward to in the future. Currently released in The Philippines and confirmed with a worldwide release, The Lord of the Rings: Heroes of Middle-earth is a game many people (ourselves included) will dedicate a lot of time to. By all means, a title to look forward to! Publisher: Playdemic Platform: iOS and Android Country: India, Philippines, Australia, New Zealand and Denmark "What happens when an Ewok takes on a Tusken Raider? Can a flock of porcs tackle a stormtrooper in a standoff? Who would win in a showdown between Luke Skywalker and Boba Fett? This is LEGO Star Wars Battles, a new mobile game that combines competitive combat, character collecting, and tower building with the classic charm and humor of LEGO. Lead an army of LEGO Star Wars characters into real-time multiplayer PvP battles in arenas inspired by iconic locations from throughout the galaxy. Collect and upgrade characters and vehicles and craft both light and dark side armies to take into battle. Build LEGO towers on the battlefield to strategically combat, defend, and capture territory as you push toward the enemy base to claim victory." Publisher: KONAMI Platform: Android/iOS Country: Hong Kong, Canada, Netherlands While it doesn't feature a worldwide release JUST YET, this card battler has amassed a bigger following than you might imagine. From the classical card battler from back in the day, where players would physically collect thousands of cards and play against each other in face-to-face duels, the same concept has now been elevated in Yu-Gi-Oh! CROSS DUEL, so that players can collect their favourite cards and assemble their best decks and battle against each other in four-man online brawls, that can span all across the world. The game will feature fantastic 3D animations and interactions, and if you're a long-time fan of the series, you will definitely love the immersive world CROSS DUEL will bring. Publisher: Happy Elements Platform: Android/iOS Country: US, UK, Australia, Canada and 10 more countries Ensemble Stars!! Music is an up-and-coming title that will make all players who've watched the Netflix show jump with joy at the news of a worldwide, global release. While the game is available in a lot of regions already, it is still not widely available for everyone, so if you're not in one of the countries it was released, hang tight. This rhythm-based puzzle RPG space is something which feels wholly unprecedented. That said, I'm very interested in seeing how the IP is used to its fullest extent within a space which is known for reskinning and palette-swapping enemies in order to pad out the roster. Definitely one to watch. Below is some gameplay, courtesy of the iOSTouchPlayHD channel. Publisher: ZeptoLab Platform: iOS/Android Country: United Kingdom Om Nom is back, however this time he's a bit closer to Stealth Espionage Action rather than being up to his traditional candy consuming or rope cutting antics. In Cybernom you'll move him around, hack terminals and outwit the various defences of a futuristic office-complex/sinister-lair. There's some footage below, courtesy of iOSTouchPlayHD on Youtube. Publisher: Take Two Platform: Android/Country: Malaysia and The Philippines XCOMs next foray into mobile steps away from the tactical gameplay we are used to seeing, and instead toward the gacha-powered, team-based RPG that we've seen popularized by games like RAID: Shadow Legends. Gameplay is already starting to come out for the game, which can be currently be played via Google Play in The Philippines and Malaysia. Keep your eyes on the site, as we'll have our opinions out on it shortly. Next Up : 10 influential accessible mobile games Sign up! Get Pocket Gamer tips, news & features in your inbox
